Clean Air Zone (CAZ)
11029 Horace Harding Expy
Corona, NY 11368

Dear Serge,

I am writing this letter to express my appreciation and gratitude to you and to the CAZ team for developing an air purification machine that has truly made a huge difference in mine and my family's health and wellbeing.

As a health care professional, I understand the important role clean, pure air plays in the promotion of good health. Before the installation of the CAZ air purification system in my home, my family and I, had experienced various respiratory disorders and symptoms related to allergies. We now understand, that like most homes, ours suffered from poor indoor air quality including issues with mold spores and other microscopic irritants and pollutants.

In a relatively short time after the installation of the CAZ air purifier we noticed a significant improvement in the "freshness" and quality of the air. The reduction or elimination of the pollutants that were contributing to our poor indoor air quality has resulted in everyone feeling more energized, clear headed, and healthier.

I can not say enough about the health benefits of clean air, but I also want to mention that the environmentally friendly green technology used in your systems is important to us. The use of natural biologic element to remove an organic pollutant, is an innovative sustainable approach to air purification.

The CAZ Machine's Maintenance is simple and we never had to worry about disposing of dirty filters or other hazardous waste. A simple water connection and provision of an electrical outlet was all that was needed to install your machine. We did not need to do any expensive modifications to get the benefits of clean pure air. Again, on behalf of myself and my family I want to thank you for making this revolutionary technology available.

Sincerely,

Dan Levy, MD
